***Election/Restrictions***

Applicant's election without traverse of Group I, Claims 1-16 and 20 in the reply filed on 10-17-2008 is acknowledged.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4, 5, 6, 7, 15, 16 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia Torres(U.S.Pat.5,657,685) in view of Rubtsov(U.S.Pat.6,283,327). Garcia Torres discloses a machine supplying food products in slices and/or doses of semiliquid products but does not show a rotating hopper. Rubstov discloses a material feed system for selectively delivering lightweight fibers that shows a rotating hopper. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a rotating hopper as taught by Rubstov with the device of Garcia Torres so as to agitate material and facilitate flow.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia Torres and Rubstov and in further view of Krader et al.(US2003/0099152). Garcia Torres and Rubstov discloses a machine supplying food products in slices and/or doses of semiliquid products but does not show a crescent shaped hole. Krader discloses a device for producing a mixture of products that shows a crescent shaped hole. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a crescent shaped hole as taught by Krader with the device Garcia in view of Rubstov so as to provide a rounded edge.

***Allowable Subject Matter***

Claims 3, 6, 8, 9, 10, 12, 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rauch, Ganz and Font are cited to show structure similar to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL L. ROBINSON whose telephone number is (571)272-4788. The examiner can normally be reached on m-f 5:30-2:30.
